DEFINITIONS

COVERED EMPLOYER
Employers other than agricultural or domestic:

To be a covered employer, an employer must meet one or more of the following criteria:
- have an annual payroll which exceeds $1,000 in a calendar year
- acquire all or a substantial portion of a covered business or
- be subject to FUTA

Agricultural and domestic employers:

If the employer is an agricultural entity, the employer must pay total cash wages of $20,000 or more in a calendar quarter or employ 10 or more workers in 20 different weeks in a calendar year to be covered.

A domestic employer who pays total cash wages of $1,000 or more in a calendar quarter is a covered employer.

In addition, if the agricultural or domestic employer has another business which is covered, the employer must also report its agricultural or domestic employees, regardless of the amount of wages paid or number of employees.

COVERED EMPLOYMENT
Covered employment includes all services performed for wages or under contract, unless specifically excluded by law.
Some common exclusions from covered employment are:
- individuals in the employ of that individual's son, daughter or spouse
- children under 21 employed by parent (or partnership of parents)
- real estate, insurance and securities salespeople paid solely by commission and without guaranteed earnings
- fulltime students working in a program taken for credit
- inmates working for a state correction or custodial institution
- elected public officials
- railroad employees
- church employees
- children under 18 delivering and distributing newspapers or shopping news from house to house and business establishments
- physically or mentally impaired individuals working in a rehabilitation facility

STANDARD INDUSTRIAL CLASSIFICATION (SIC CODE)
Each business is assigned a (SIC) code that describes the business based upon its nature-of-business in accordance with the Standard Industrial Classification Manual, 1987 edition.

ESTABLISHMENT
Employment for a given month is the number of workers covered under the Montana unemployment insurance laws who earned wages from a reporting unit during the pay period which includes the 12th day of the month.

GROSS WAGES
Gross wages, as reported on the quarterly contribution report of employers covered by the unemployment insurance law, are the total amount of compensation paid by the employer during the quarter.

DISCLOSURE RESTRICTIONS
Publication of employment and wage data is withheld for any industry level which consists of fewer than three reporting units or in which a single establishment accounts for 80 percent or more of the industry's employment.

AVERAGE WEEKLY WAGE (AWW) is derived from the total wages of all reported employees of any industry or major group, the average monthly employment for that industry or group during the week of the 12th of each month and the number of weeks in the quarter.

Average Weekly Wage is affected by large bonuses, overtime, pay premiums, part-time employment, commissions, etc. These may drastically raise or lower the statewide or county level figure.

AWW is given as a statistical figure which can be used with current employment data to evaluate and better understand the economic position of an industry or major group.

It is not the size of the average employee's paycheck.

SECOND QUARTER, 1989, IN REVIEW

Employment across all industries in Montana generally grew in second quarter 1989. Construction employment displayed the largest percentage growth over 1988 second quarter figures. Services also showed significant employment growth through the year. Services with employment of 68,517 had the greatest number of covered workers. This amounted to 24.2% of the total number of covered workers. With Retail Trade reporting 61,689, its employment was 21.9% of the total. Total employment in Private Industry was 217,441 in second quarter 1989.

Average wages in all industries were generally higher than wages one year ago. The average wage over all major industry groups was $337/week in second quarter. Only Finance, Insurance, and Real Estate reflected a decrease in average wages over the period. Highest average wages occurred in the Mining industry with Manufacturing wages ranking second. The average wages for those two industries were $609/week and $465/week respectively. Retail Trade had the lowest average wages of $191/week yet those wages reflected a slight increase from one year ago.

The number of establishments reporting in second quarter totaled 26,610. The total was only .3% larger than one year ago. Services had 94 additional establishments reporting while Retail Trade had 73 more. There were four industries with fewer reporting establishments those being: Mining; Construction; Manufacturing; and Finance, Insurance, and Real Estate.

EMPLOYMENT & WAGE COMPARISON GRAPHS

The graphs on the following pages (by major industry group) compare employment and wages for the years 1985, 1986, 1987, 1988 and 1989.

Note that seasonal industries in Montana include Agriculture, Forestry and Fishing; Construction; Manufacturing (due to Logging); Real Estate; and Services (due to the tourist trade). Also, there is a large drop in Government employment during the summer months when public schools are closed.
